

Build a Rocket

Steps

- Cut out this rocket template.
- Place it on stiff pape, cardboard or foamcore and trace the shape onto two pieces (A and B).
Note that only A has slits in it.
- Cut out the shapes. Remember, only cut out the slots on the A piece.
- Trace and cut the circle shapes.
- Cut the circles in half to form semicircles and cut the slots on each.
- Add details to the pieces with marker, crayon, paint or paper scraps or foil.
- Slip the pieces together at the slots.
- Glue pieces together.
- *Count down to blast off!*

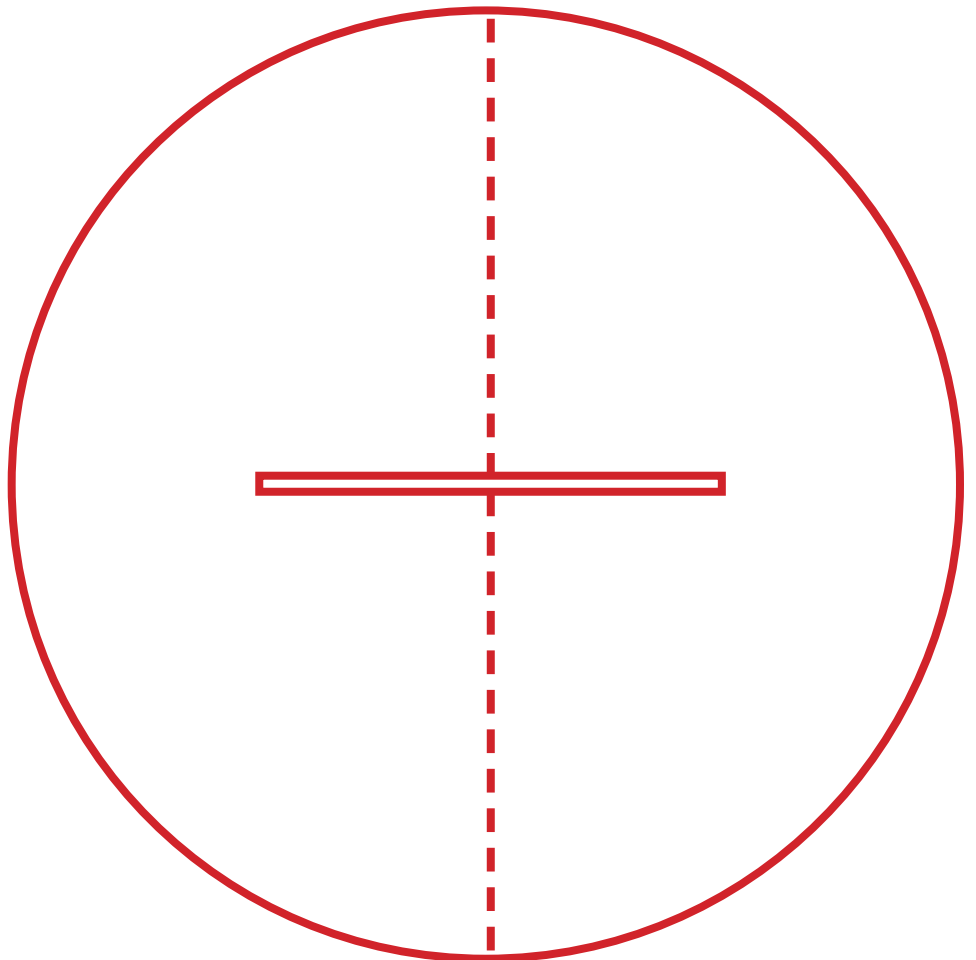

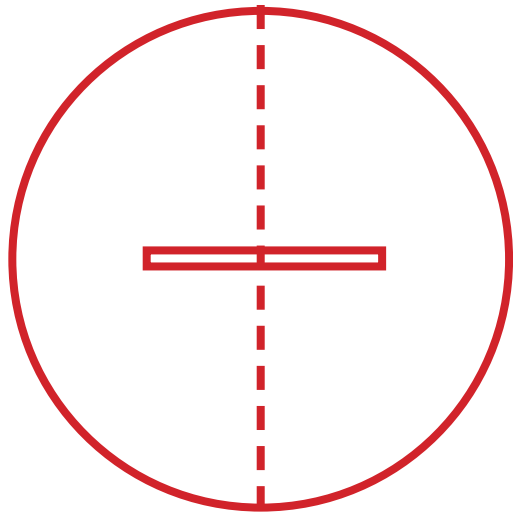

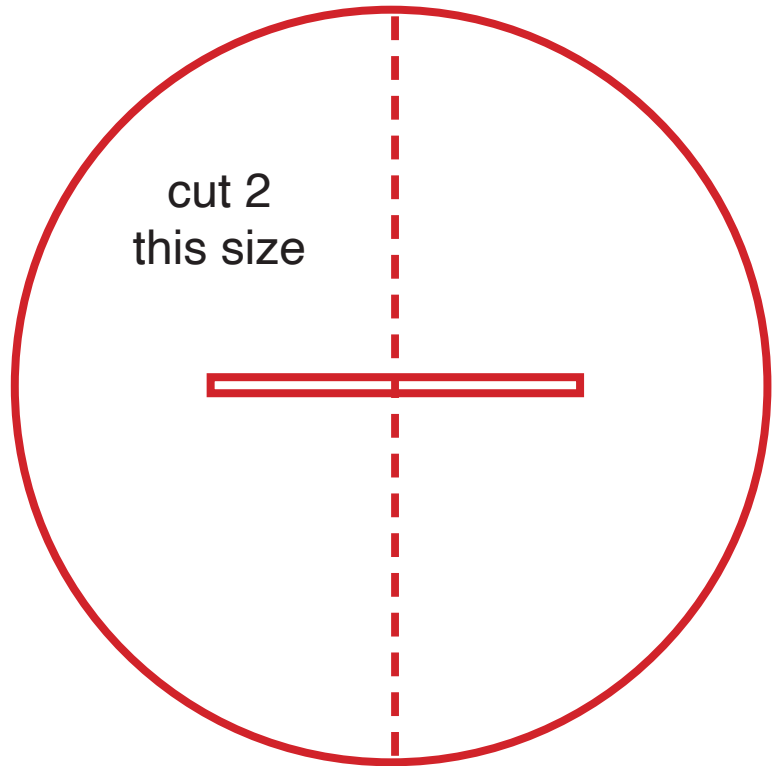

Cut slits (indicated with dashed lines) only on rocket piece A.

Vertical grain of cardboard for maximum stability

TOP SLOT PIECE A ONLY

BOTTOM SLOT PIECE B ONLY
